Assignment - 4

Q.1 WAP to input three number and find there sum and average.

Answer

```
echo " Enter first number: "
read a
echo " Enter second number: "
read b
echo " Enter third number: "
read c
sum = $((a + b + c))
avg = $((sum/3))
echo "sum = $sum"
echo "average = $avg"
```

OUTPUT

```
Enter first number:
10
Enter second number:
20
Enter third number:
30
Sum = 60
Average = 20
```

Q.2 WAP to input radius of a circle and find the area and perimeter.

Ans

```
echo "Enter radius of the circle:"
read r
pi = 3.14
area = $(echo "$pi * $r * $r" | bc)
perimeter = $(echo "2 * $pi * $r" | bc)
echo "area of circle = $area"
echo "perimeter of circle = $perimeter"
```

Output:

```
Enter the radius of the circle:
7
Area of Circle = 153.86
Perimeter of circle = 43.96
```

Q.3 WAP to input 3 side of a triangle and then area of triangle.

```
echo "Enter 1st side:"
read a
echo "Enter 2nd side:"
read b
echo "Enter 3rd side:"
read c
s = $((echo "($a + $b + $c) / 2" | bc))
area = $(echo "sqrt($s * ($s - $a) * ($s - $b) * ($s - $c))" | bc -l)
echo "Area of Triangle = $area"
```

Output:

```
Enter 1st side:
3
Enter 2nd side:
1
Enter 3 rd side
5
Area of Triangle: 6.000000
```

Q.4 WAP to input the principal amount, rate of interest and no. of term and find simple interest.

```
echo "Enter principle amount:"
read p
echo "Enter rate of interest:"
read r
echo "Enter Time (in years):"
read t
si = $(echo "($p * $r * $t) / 100" | bc)
echo "Simple Interest = $si"
```

OUTPUT

```
Enter Principal Amount:
100
Enter Rate of Interest:
5
Enter Time (in years):
2
Simple Interest = 100
```
